ZENKILL III

LONG SHOT WASP & HORNET KILLER

DESCRIPTION:

Long-range, fast-acting Wasp and Hornet Killer with synthetic pyrethroid formula that literally stops wasp, hornets, yellow jackets, and bees in flight on contact.

FEATURES AND BENEFITS:

- Kills Wasps, Hornets, Yellow Jackets and Bees on Contact
- Jet Stream Sprays up to 20 feet
- Instant Knockdown of Wasps, Hornets, Yellow Jackets, & Bees
- EPA Registered
- High Dielectric Strength (41,000 Volts)

APPLICATIONS AND USES:

Intended for outdoor use to destroy nests in telephone poles, trees, bushes, chimneys, cracks, crevices, attics, warehouses, and other areas where food items are not exposed.

DIRECTIONS:

Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will keep wasps and hornets returning to the nests. Wait at least 24 hours before removing the nest. To kill wasp, hornets, and yellow jackets, and bees under eaves, screens, window frames, doors, patios, cracks, holes or crevices, wherever insects are noticed, spray for about 1 - 2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes, or utensils. Avoid spraying vegetation directly.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. May cause staining (darkening) of asphalt surfaces and shingles

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY
