### VAL-U-RELEASE

Asphalt Release Agent

This product provides a molecular film — a thin, heat-resistant shield — that does not allow hot, sticky asphalt to adhere to surfaces. Asphalt will slide right off dump beds, rollers, spreaders, rakes, shovels and other surfaces. It is made with 100% natural ingredients, no hazardous diesel fuels, no harmful or noxious fumes. The special biodegradable formula is safe for both users and the environment, and it won't degrade the quality of the asphalt. It even works as a seal to protect against the damaging effects of rust and corrosion. Spraying on equipment will form a heat-resistant shield that will not run off, reducing the chance of soil contamination.
